DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 8-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, the recitation in claim 8, lines 9-10, "more flexible portion...said recesses" is seen to be new matter, unsupported by the disclosure as originally filed since the disclosure is silent as to the "flexible" nature of the wall portion.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over either of Watanabe or Kanai in view of Haraguchi et al, all of record, or as unpatentable over Haraguchi et al in view of either of Watanabe or Kanai for the reasons set forth in paragraph 3) of the previous Office action.

Art Unit: 3654

Response to Arguments

5. Applicant's arguments filed 1/26/05 have been fully considered but they are not persuasive. Applicant argues that the "flexible" nature of the thinner wall portions is inherent in the disclosure of the invention. However, even though the thinner wall portions may be less strong than the thicker portions, it does not mean that those wall portions are "flexible". Nothing in the original disclosure relates to such interpretation or to the applicant's previous arguments that such flexible wall portions have important attributes. Furthermore, the prior art rejections appear proper for reasons of record.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
